

ADVANTAGE TESTING  
of Los Angeles

# ATLA FOUNDATIONS: BIOLOGY

What could be more fun than an advanced summer Biology course? Beaches and amusement parks may sound enticing, but they've got nothing on cell structure and genetics! In this course, you'll learn not only about viral life cycles but also about cellular anatomy, cellular respiration, photosynthesis, and DNA and RNA replication—also known as the more challenging and complex topics presented in high school Biology. We'll give each student a sense of confidence and mastery as we move into the fall, especially given the unpredictable landscape of education in the near future. This course will be interactive, engaging, and applicable to current biological events. Hope to see you soon—virtually, of course!
