

ADVANTAGE TESTING
of Los Angeles

ATLA FOUNDATIONS: STATISTICS

In our advanced Statistics course, students will begin with a flash review of the classic statistical measurements (mean, median, first quartile, etc.), and then dive straight into some early AP course material. Students will explore the ideas of probability and randomization and learn the basics of standardizing data and looking at normal curves. After this course, the first few months of Statistics class should feel like a breeze.

“A PIONEER IN INSTITUTING THE SCRUPULOUS STANDARDS THAT HAVE ELEVATED TUTORING TO THE RESPECTED PROFESSION IT HAS BECOME.”

—THE LONDON EVENING STANDARD

- This online course runs from **July 20 to August 14, 2020**

Tyler is a graduate of Tufts University, where he double majored in Computer Science and Drama. While at Tufts, he worked on many programming and design-related projects including pitching an Olympic Games iOS application, redesigning the university's computer lab layout for a more efficient work environment, and helping to develop a small computer game that garnered Official Recognition at the Boston Indie Games Festival. After graduation, Tyler moved to Los Angeles, where he has taught a wide range of classes in the private school system.
